

2014 Healthy Youth Survey Results - Errata

March 30th, 2016

Erratum 6: QxQ Race/Ethnicity Variable G06 Response Options

During a system update to add the 2014 HYS data to the QxQ in March 2015, the response options for the race/ethnicity variable G06 were switched for prior years of data from 2002 through 2012. In 2012 and prior, the American Indian or Alaska Native response option and the Asian or Asian American response options were swapped.

Results of the G06 race/ethnicity variable for the years 2002, 2004, 2006, 2008, 2010 and 2012 were corrected on March 29th, 2016.

If you used the QxQ G06 variable between March 2015 and March 2016, please double check the results of your analysis for American Indian or Alaska Natives and Asian or Asian Americans. You can also check your results by looking at the State-level Race/Ethnicity Frequency Reports available at <http://www.askhys.net/Reports> under the Location - State – Race/Ethnicity.
