

2014 Healthy Youth Survey Results - Errata

April 14th, 2015

Erratum 4: Culled Surveys

Once the coding errors in Errata 1, 2, and 3, were corrected, a small number of surveys no longer met the valid response threshold of 15 answered questions for inclusion in the database of surveys. 188 surveys of 223,825 were culled from the entire database and 30 of 35,292 were culled from the state sample for this reason. For the state-level report, the removal of these surveys from the database changed the response percentage of 18 of 226 survey questions by 0.1%, mostly due to a change in the rounding threshold. These questions and results are noted below and were posted to www.AskHYS.net on April 14th, 2015.
