

HYS Data Product Menu

This menu compiles all the training materials and tools that are available on AskHYS.net. These resources can be used to navigate this website and use of HYS data.

Product	Link	Description
HYS Fact Sheets	https://www.askhys.net/FactSheets	This interactive tool provides a single page results summary about a specific HYS topic. You will be prompted to choose an HYS year, location, and topic.
HYS Frequency Reports	https://www.askhys.net/Reports	This interactive tool provides reports of local HYS results and frequencies of each HYS question. You will be prompted to choose an HYS year and region of interest.
HYS QxQ Analysis	https://www.askhys.net/Analyzer	This tool allows you to generate a results table for any question in the survey. You can also cross-tabulate two variables to look at their interaction with each other.
Bias Analysis	https://www.askhys.net/Reports/BiasAnalysis	Biannual summary of the bias analysis, which checks if HYS participants represent the students attending public schools in WA.
Analytic Reports	https://www.askhys.net/Reports/Analytic	Biannual details of the findings from each administration of the Healthy Youth Survey.
Risk and Protective Factor Reports	https://www.askhys.net/Reports/Analytic	Historical information and analyses of risk and protective factors in HYS data.
Past Participation Data	https://www.askhys.net/Past	The tables and response rates can be used to determine if HYS results are available for each location and grade level.
