

Healthy Youth Survey 2021 - Changes from the 2018 Survey

December 2021

Background

Survey Forms A, B, and C

To manage the length of the survey with the breadth of information desired by stakeholders, there are two questionnaires for grades 8, 10, and 12: Forms A and B. The 6th grade questionnaire is a single version (Form C), with fewer questions.

“Core items” are those that are on Forms A and B. Most of the core items are also on Form C.

Form A

The 2021 Form A has 146 questions, which is eleven more than the 2018 questionnaire.

Form B

The 2020 Form B has 138 questions which sixteen more questions than the 2018 questionnaire.

Form C

The 2020 Form C has 101 questions which is ten more question than the 2018 questionnaire.

Revision Process for 2021 Healthy Youth Survey

The HYSPC took a multi-faceted approach to planning for 2021 revisions. HYS stakeholders were notified of the revision planning process and provided opportunities to provide input through public websites, interest group meetings, and email. These same methods were also used to solicit proposals for new questions.

All four of the HYSPC agencies “tiered” the previous HYS questions by importance to program and policy. The HYSPC agencies include the Division of Behavioral Health and Recovery (DBHR) in the Washington State Health Care Authority (HCA), the Washington State Department of Health (DOH), the Liquor and Cannabis Board (LCB) and the Office of the Superintendent of Public Instruction (OSPI).

The HYSPC evaluated all proposed 2021 HYS questions and question revisions using the following criteria:

2021 Question Criteria	To consider when evaluating questions:
<p>A. Relevance of Measures: The information the question generates fits with the legislative mandate, will be useful to multiple state agencies and stakeholders, and relates to agency priorities.</p>	<ul style="list-style-type: none"> a. Is the item an adolescent health outcome or risk factor? b. Does the question fit with the legislative survey mandate? c. Is the question on a priority topic? For example, does it relate to priorities in agencies' strategic plans or is it an emerging critical health issue? d. Is the item a priority for multiple agencies & stakeholders? e. Would the question help to identify health disparities?
<p>B. Use of Measures: Data from the questions have demonstrated use for adolescent health and prevention work by multiple agencies/stakeholders, or (if new measures) have clear planned use in the short term.</p>	<ul style="list-style-type: none"> a. Is there a record of use of the item at the state or local level, or if new, is there a clear plan for application of the data? For how many agencies/stakeholders? b. Are the data critical for WA State, local, or federal performance measures? c. Are there existing grants for which funding is dependent on the measures? e. Does the question help ensure that the survey is representative of all students?
<p>C. Respondent Burden: Respondent burden (question length, difficulty, sensitivity, etc.) is minimal, or mitigated to greatest extent possible.</p>	<ul style="list-style-type: none"> a. Are the questions or response options unusually long? b. How complex is the question? c. Is the question unusually sensitive or potentially offensive? d. Does the question add to respondent burden by lacking inclusive response options?
<p>D. Data availability: Data are not available at the state or local level from other sources.</p>	<ul style="list-style-type: none"> a. Is the data available from other sources for WA State? b. Is the data available from other sources for WA local communities?
<p>E. Technical Considerations: Questions have been assessed for validity and reliability or are used in other surveys, and the data they will generate are appropriate for the planned analyses.</p>	<ul style="list-style-type: none"> a. Has the item been field tested or has it been used in other state/national surveys? b. What type of analyses are planned with the proposed item and will the HYS data from this item be appropriate for the planned analyses? c. What is the estimated prevalence?

2021 Question Criteria	To consider when evaluating questions:
<p>F. Trends: The health outcome or behavior has been changing and is expected to change in the next two years, OR demonstrating lack of change is important.</p>	<p>a. How many years of data do we have on this item? How many years of data do we need to meaningfully use the results?</p> <p>b. Is the trend changing for this item? Did the trend change in the last 2 years? Is a change anticipated within the next 2 years? Would there be a negative impact of rotating it off the survey for 2020 and back on in 2020?</p>

Proposed revisions were discussed with stakeholders during four all-day meetings in Kent and Spokane in July. These meetings were also available via webinar. At these meetings, additional feedback was collected. The committee noted all stakeholders’ input to include in final decisions.

The draft survey questionnaire was then assessed as a whole for the following:

Overall Survey Questionnaire Criteria

1. Respondent burden. Criteria C, above, applied to questionnaire as a whole, with primary focus on ability to complete in one class period.
2. Balance of information on topical areas, as related to agency needs and mandates. Criteria A and Criteria B.b., above, applied to the questionnaire as a whole.

Summary of Changes

Overall Changes

Questions on migrant status and mobility were added on Forms A and C and a question on school attendance was added on all three forms.

E-survey Location Screener

One question was added to the e-survey Forms A, B, and C asking where students took the survey (on or off school property). If students took the survey off school property, they were asked two additional questions to determine if they were in a place where they could answer honestly.

Demographics

Changes were made to response options to both the living situation questions, and the sexual orientation question on Forms A and B. A new gender identity question was added on Forms A and B. The existing dichotomous gender question was revised on all three forms.

Alcohol, Tobacco and Other Drug Use – Lifetime Use

Lifetime use questions on all forms stayed the same, but response options were expanded to be able to tease out the past-year use of any substance. These changes will be made on Forms A and C.

Alcohol, Tobacco and Other Drug Use - 30-Day Use

The drug used for quality checks was revised on all three forms. In addition, 30-day use of smoking tobacco in a pipe was rotated on Form B.

Other Tobacco-Related Questions

Age at first use of vape pens was added on Form B. All substance use on school property questions were combined in one 'select all that apply' question to conserve space on Forms A and B.

Other Marijuana-Related Questions

A new question measuring simultaneous use of marijuana and alcohol in the past 30 days was added on Form A. Response options were revised for the marijuana question that provides information of method of use among youth who used marijuana in the past 30 days.

Changes to All Forms

- Adopted and added to the beginning of relevant sections, consistent definitions of alcohol, marijuana, parenting, bullying, and vaping. These definitions were vetted by youth focus groups.
- Replaced "he or she" and / or "him or her" with "they".
- Replaced "parents" with "parent(s)", "mothers" with "mother(s)", "mom" with "mom(s)", and "dad" with "dad(s)".
